

# STF LEVER

Proudly crafted is a lever adapted from those used in the All Japan Road Race Championship, now tailored for street use

6 Colors Same as lever guard

## What's good about STF levers?

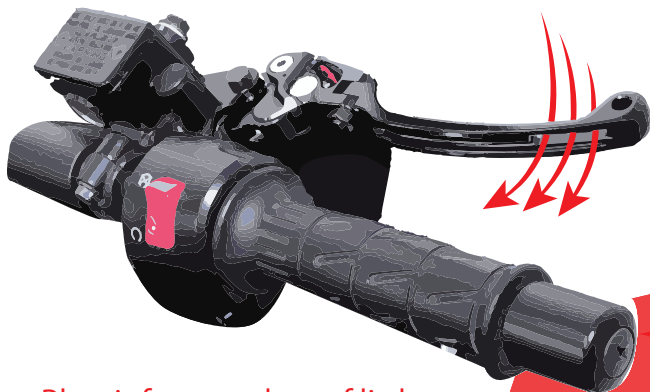

With a high-precision, stable holder, you get a direct feel from the moment you start squeezing, ensuring no loss of power. It gives you the control you've always wanted.

Easily adjust the lever position!

Foldable lever that won't break easily, even if you tip over

Plus, it features lots of little details like hole processing and lightweight design

## Installation Image

# BRAKE LEVER GUARD

Compliant with MFJ road racing regulations

**ACTIVE**

How to order

6  
Colors  
Same as  
STF lever

The hybrid structure of aluminum and PBT resin suppresses resonance

## STEP 1 Choose the color of the lever guard and bar end

### COLOR

The offset shape does not hinder throttle operation

## STEP 2 Select the mounting kit that suits your vehicle
