

ACTIVE EVO2 GRIP

The pattern is based on the grips used on YAMAHA racing vehicles, which are durable, non-slip, and easy to maneuver.

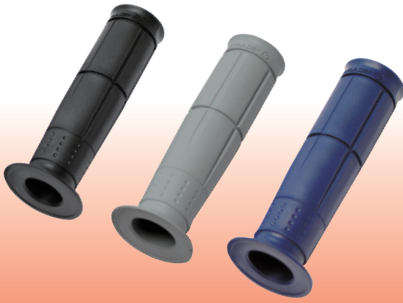

▼Details

Compatible handle diameter	end type	full length
Φ22.2	through hole type	120mm

ACTIVE Elastomeric tapered GRIP

Material with excellent vibration absorption and weather resistance. Versatile design with narrow-cut ends, L-shaped slits for easy fingering, and wiring grooves for ease of use.
